

# Smart Power Grid Technology Conference

---

## SMART POWER GRID TECHNOLOGY CONFERENCE

Mon, March 14, 2011

Santa Clara, CA

URL: [www.spgtc.org](http://www.spgtc.org) (under construction)

The Smart Power Grid Technology conference will feature a multi-session event that covers the full technology/business ecosystem, including Meter to inside the building and the Meter outside to the grid. The in-home portion of the event will include discussions on home environmental monitoring and adjustment (lighting, temp) as well as time of use control, monitoring and whole house data connectivity for entertainment/data collection. The Meter to grid side will cover RF and data capture at the meter, remote and through line data collection, DBMS infrastructure, system security and billing/pro-active data control back to the individual units through the grid. The conference is seeking 2 keynote speakers, one on a significant technical aspect of the smart grid either in-home, in-grid or the meter itself and one on the business aspects of the smart grid marketplace. The conference will have additional detailed speakers, and include a maximum of 2 panels with up to 5 speakers each - one per session, covering the in-building and grid/IT sides of the smart grid ecosystem.
